

GREEN CENTURY FUNDS

More than 30 years ago, a group of environmental leaders founded Green Century^o to give people a way to care for the planet and save for their futures.

Our Ownership: 100% Mission Driven

100% of Our Profits

Since 1991, every dollar Green Century earns managing its Funds supports our nonprofit owners and their work. This unique aspect makes Green Century truly a one- of-a-kind firm, even among other firms that offer sustainable investing strategies. Last year, Green Century gave \$1M back to our owners.

100% for the Planet

Green Century's ownership means that our profits don't benefit just a few individuals but instead are put to use for the good of all. Our profits support environmental and public health organizations that make a meaningful impact on issues that include cutting single-use plastics to protecting forests and pushing for clean transportation.

100% Action for Change

Our owners are advocates for the public interest and they speak out for a healthier, safer world. They have championed changes that have resulted in more recycling and less waste, cleaner air and cleaner energy.

Few things are more important than keeping kids safe and healthy. Working together with our nonprofit owners and you, we can protect them from hidden dangers, toxic threats and provide them with a cleaner environment.

Plastics

Plastic pollution threatens birds, fish and other wildlife and PIRG is working to phase out plastics.

This year, their campaign successfully convinced Amazon to phase out its blue and white plastic mailing envelopes and bags in favor of recyclable alternatives.

The PIRGs turned in more than 138,000 petition signatures to Amazon headquarters as part of the campaign.

Pollinators

Millions of bees that we rely on to pollinate our food are dying every year, and scientists point to a widely used class of pesticides as one of the main culprits.

For the past several years, PIRG has asked the EPA to ban these pesticides nationwide, and they have failed to do so. PIRG is calling on governors to ban the sale of bee-killing pesticides to protect our pollinators.

Right to Repair

For farmers, simply getting access to all the tools needed to fix their tractors has resulted in lost planting and harvesting time.

The nation's first Tractor Right to Repair bill was signed in Colorado this year, giving farmers and independent shops access to what they need to fix tractors and combines. This success comes after years of campaigning by PIRG, National Farmers Union, iFixit, and farmers.

Our Owners

Green Century was founded by nine Public Interest Research Groups (PIRG), which are a federation of nonprofit organizations and part of the Public Interest Network.

In 1991, many of the largest PIRGs came together to create a new kind of mutual fund family. The founding organizations are: California Public Interest Research Group (CALPIRG), Citizen Lobby of New Jersey

(NJPIRG), Colorado Public Interest Research Group (COPIRG), ConnPIRG Citizen Lobby, Fund for the Public Interest, Massachusetts Public Interest Research Group (MASSPIRG), MOPIRG Citizen Organization, PIRGIM Public Interest Lobby, and Washington State Public Interest Research Group (WASHPIRG).

Green Century is the only mutual fund company in the U.S. founded and owned by environmental nonprofits.

^oGreen Century Capital Management, Inc. (Green Century) is the investment advisor to the Green Century Funds (the Funds).

You should carefully consider the Fund's investment objectives, risks, charges, and expenses before investing. To obtain a Prospectus that contains this and other information about the Funds please visit www.greencentury.com, email info@greencentury.com, or call 1-800-934-7336. Please read the Prospectus carefully before investing.

Stocks will fluctuate in response to factors that may affect a single company, industry, sector, country, region or the market as a whole and may perform worse than the market. Foreign securities are subject to additional risks such as currency fluctuations, regional economic and political conditions, differences in accounting methods, and other unique risks compared to investing in securities of U.S. issuers. Bonds are subject to a variety of risks including interest rate, credit, and inflation risk. A sustainable investment strategy which incorporates environmental, social and governance criteria may result in lower or higher returns than an investment strategy that does not include such criteria.
