

GREEN CENTURY FUNDS

2022 Shareholder Season Highlights

During the 2021-2022 shareholder season, Green Century^o secured 20 environmental policy changes with major global companies.

Several of Green Century's proposals, including one at Costco*, achieved record-breaking majority shareholder votes, and Green Century won more majority votes on environmental proposals than any other firm.

Green Century's shareholder advocacy program is among the longest-running in the field and in the

2021-2022 season included the following work:

- In-house voting of proxies for over 600 companies
- Engagements with over 80 companies
- Filed resolutions with 35 companies

Results: While many firms report on activities, Green Century also reports on the results. Our focus on outcomes results in positive changes in environmental policies and supply chain practices that protect people and our planet.

Chevron

Coca-Cola

Lowe's

Kroger

Chevron* has abandoned plans to drill in the Arctic National Wildlife Refuge and has ended its involvement in the Arctic region following two successive shareholder proposals from Green Century. Green Century filed an initial proposal calling on Chevron to renounce Arctic drilling in December 2020. Though Chevron publicly rebuffed that proposal, the company quietly went about the expensive process of exiting its Arctic leases. The news of Chevron's Arctic exit finally became public at the end of May.

Coca-Cola* announced the first known goal of its kind -- to have at least 25% of all beverages sold globally distributed in refillable or returnable bottles or in refillable containers by 2030. Currently, reusable packaging accounts for 16% of the company's beverage portfolio. Coca-Cola is rated as the world's worst corporate plastic polluter. The announcement comes after Green Century co-led the filing of a proposal urging the company to reduce its reliance on single-use plastic and increase its use of refillable and reusable packaging.

Lowe's* agreed in March to accelerate its efforts to eliminate deforestation and the logging of old growth forests in its supply chains. Notably, Lowe's is evaluating whether it can end sourcing from forests that have never been logged. Lowe's is one of the world's largest home improvement retailers and a major purchaser of wood products. Lowe's largest competitor, Home Depot*, would not agree to take action on a similar proposal, so Green Century brought it to a vote and 65% of the company's shareholders instructed it to follow in Lowe's footsteps in May.

Kroger* committed to set science-based targets to reduce greenhouse gas emissions from its full value chain, agreeing to the request of a Green Century shareholder proposal withdrawn in April in exchange for this commitment. The shareholder proposal called on the largest U.S. grocery chain to set targets for its Scope 1, 2 and 3 emissions that would lead to net zero emissions by 2050 or sooner. Scope 1 and 2 emissions come from a company's operations and purchased energy, while the emissions from its supply chains and using its products are Scope 3. Greenhouse gas emissions from the food system represent roughly one-third of all planet-warming emissions.

Mattel

Apple

McDonald's

Costco

Chubb, Travelers,
The Hartford

Mattel* announced in April that it plans to reduce the amount of plastic packaging with its products. The company, which makes a wide array of popular toys from Barbie dolls to Hot Wheels cars, announced a new goal to reduce plastic packaging by 25% per product by 2030. Mattel's action comes after the toymaker reached an agreement last year with Green Century.

Apple* announced in November 2021 that it would provide individual consumers access to replacement parts, tools and repair manuals needed to perform common repairs to its products, marking a notable reversal for the company. Apple had vigorously lobbied against legislation that would require them to allow others to fix their products. The announcement came after discussions with Apple and on the same day that Green Century had to decide whether to press forward on a right-to-repair shareholder proposal. Apple launched the program in April.

McDonald's* has been a target of Green Century's shareholder advocacy in recent years because of the fast-food giant's reliance on unsustainable factory farming practices. In 2022, Green Century's President Leslie Samuelrich was nominated to McDonald's board of directors, and the U.S. Humane Society has credited the McDonald's board fight with helping pressure **CVS* and Walgreens* to accelerate their transitions to cage-free eggs and pushing General Mills* and Denny's* to move towards elimination of gestation crates in their pork supply chains.**

Nearly 70% of **Costco shareholders in January voted in favor of a Green Century proposal requesting that the company set greenhouse gas emission targets.** Green Century's proposal prompted Costco to announce an expedited timeline for disclosing supply chain emissions, to commit to developing a Scope 3 action plan and reduction targets, and to announce its first reduction targets for its operational and purchased energy (Scope 1 and 2) emissions.

Chubb*, Travelers* and The Hartford* had shareholder votes on their ballots related to Green Century's new Insure a Fossil Free Future Campaign. **Green Century asked each company to stop underwriting new fossil fuel projects.** The proposals garnered votes from 19.4%, 13.2% and 8.8% of the insurers' shareholders, respectively. Our work with three of the fifteen largest commercial property and casualty insurance companies to have them align with climate science has just begun.
